Important Safety Notice

This datasheet covers ISO*STAR valve assemblies approved for use in both ATEX and non-ATEX environments. To maintain safety and compliance, always follow the datasheet technical guidelines specifying which valve bodies and coils combinations are suitable to be used in ATEX environments. Below is a quick reference guide showing which valve bodies, coils, and connector plugs can be used in ATEX or non-ATEX environments.

Valves for atex environments

Important Information
This section of the datasheet covers ISO*STAR valve assemblies intended for use in ATEX environments. To ensure compliance and safety, use only the valve bodies and coils listed here and follow all technical recommendations carefully.

Important Note

- Valve assemblies shown in this section (coils + bodies) do not carry full ATEX certification, but can be used in ATEX zones if the customer performs a proper risk assessment according to EN ISO 80079-36 standard.
- Only coils marked as "ATEX certified" are officially approved for use in explosive environments
- Do not mix components from this section with those from the previous non-ATEX section.
- For detailed guidance on ATEX zone compliance, please contact IMI Technical Support.
- Please contact IMI technical support if you require an ATEX declaration of conformity referring to any particular valve combination (coil + body) found in this section

Sandwich plate with check valves

Symbol	ISO	Design	Flow (l/min)	Operating pressure (bar)	Weight (kg)	Model
	1	Poppet valves	500	3 ... 8	0,45	FP7050
	3	Poppet valves	3400	3 ... 8	2,05	FP7070

Application:
With this type of intermediate plate together with a 5/3-way valve, center position open, a piston movment can be stopped in any desired position. This position will kept during a long period.

Note:
Metal to metal sealed spool and sleeve valves have always a small amount of leak because of its design. Therefore 5/3-way valves, center position closed, are only applicable for short stops.

Caution: Not suitable for safety applications!
